

The Premier Conference on IP-ready Security Technology

February 1-2, 2010
Delray Beach Marriott
Delray Beach, FL

Call for Presentations

The sixth annual TechSec Solutions will be held February 1-2, 2010, at the Delray Beach Marriott in Delray Beach, Fla., and is being developed once again by the editors of *Security Director News* and *Security Systems News*. The two-day conference pairs a two-track educational program with an IP-focused exhibition space. However, the exhibition hall is closed during educational programming, allowing all of the stakeholders to come together for broad discussions and spirited debate.

This year we are looking for presentations that cover the topics below. We will choose one presentation from these topics that best suit the goal of the conference and the needs of the attendees.

Topics of interest:

- Standards
- Security as a service
- Video analytics
- Public sector and private sector case studies
- Non-traditional uses of security technologies
- Door-to-desktop applications
- Making the leap to IP
- Hybrid systems and making use of existing infrastructure
- How to sell the IP ROI to the C-suite
- How IP can make investigations quicker and easier
- High-definition video

We are also accepting submissions for our second annual Technology Lightning Round. We will choose five emerging technology providers to outline the details of their IP products, what benefits they offer and how they can change the market.

Submissions

IT and physical security integrators, end users, consultants and manufacturers operating in the physical security industry are invited to submit electronically (Word or PDF file) an outline and summary of a topic and presentation. The length of the summary should be no more than one page, and the outline no more than two pages.

Presentations will be considered for acceptance according to the following guidelines:

- Addresses IP technology in the physical security market
- Appeals to multiple audiences both at a low-technical and high-technical level

- Presented by subject matter expert
- Embraces IT's role in administering physical security
- Includes the perspectives of different stakeholders
- Is driven by issues or trends in the physical security marketplace
- Is product agnostic
- Is unique to TechSec Solutions

Presentations

Submitters of accepted presentations must guarantee that they will appear at the conference. Submitters will be required to sign an agreement to this effect, and will be responsible for solving any personnel issues that may arise between the time of acceptance and presentation at the conference.

Dates and Deadlines

Submission: July 22, 2009

Notification to submitters: August 21, 2009

Conference: February 1-2, 2010, at Delray Beach Marriott in Delray Beach, Fla.
